

Manish Verma

Frontend Developer

📞 9602938244 ✉ manishverma8244@gmail.com 📁 Portfolio 🔗 LinkedIn 🐙 GitHub </> Leetcode

Summary	Frontend Developer specializing in React.js and JavaScript (ES6+), experienced in crafting scalable, responsive web applications. Strong expertise in component-driven architecture, REST API integration, UI performance tuning, and modern frontend tooling. Proven ability to deliver polished user experiences in Agile environments.			
Technical Skills	Languages	Frontend		
	JavaScript (ES6+)	React.js, HTML5, CSS3, Redux, Material-UI, Shadcn-UI, TanStack, React Hooks, zustand, Jest		
	Tools	Git, GitHub, AWS (Basic), Cloudinary		
Projects	Gemini AI Chat Platform https://gemini-cyan-xi.vercel.app/ Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Vercel - Developed a fully functional Google Gemini AI chatbot clone using React.js and Vite, delivering a responsive conversational interface and processing asynchronous streaming responses in under 2 seconds. - Implemented Google's Gemini-Pro model to enhance the chatbot's text generation capabilities, delivering a 35% reduction in response latency and allowing for more seamless asynchronous communication handling. - Established centralized state management using React Context API to manage chat history, user inputs, recent prompts, and loading states across components. - Designed advanced UI/UX features including sidebar-based prompt history, typing animations, preloaders, fade-in transitions, and light/dark theme support. - Deployed the application on Vercel, demonstrating end-to-end ownership of a production-ready generative AI web application.			
	Shopsy E-Commerce Web Application https://shopsy-nine-snowy.vercel.app/ Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Vercel - Developed a React-based e-commerce platform, improving UI responsiveness by 30% through optimized component rendering and reusable design patterns. - Engineered product listing and cart workflows using React Hooks and structured state management to ensure smooth user interactions. - Crafted mobile-first, responsive layouts using Tailwind CSS, Flexbox, and Grid for consistent cross-browser compatibility. - Optimized frontend performance and code readability by applying clean code principles and reducing unnecessary re-renders.			
	MovieFlix Movie Browsing Application https://movie-flix-movie-app.vercel.app/ Tech Stack: React.js, JavaScript (ES6+), CSS3 - Created a dynamic movie browsing application using React functional components to support real-time UI updates. - Implemented search functionality and dynamic content rendering through React Hooks to enhance discoverability and engagement. - Managed application state and component props efficiently to maintain consistent UI behavior. - Designed a responsive interface using modern CSS techniques for seamless viewing across devices.
