Summary	Frontend Developer specializing in React.js, TypeScript, and JavaScript (ES6+), with hands-on experience building scalable, responsive web applications and AI-powered interfaces. Strong expertise in component-driven architecture, REST API integration, state management, UI performance optimization, and modern frontend tooling. Experienced in integrating third-party AI/LLM APIs to build conversational and voice-driven assistant applications, alongside full-stack e-commerce and content-browsing platforms. Proven ability to deliver polished, user-focused interfaces in Agile development environments.

Technical Skills	Languages	Frontend
	JavaScript (ES6+)	React.js, HTML5, CSS3, Redux, Material-UI, Shadcn-UI, TanStack, React Hooks, zustand, Jest
	Tools	
	Git, GitHub, AWS (Basic), Cloudinary	

Projects	<u>AI Assistant – React-Focused AI Chat Application</u> • Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Vercel, Grok API • Built a full-stack AI chat assistant using React and TypeScript, integrating xAI's Grok API to deliver context-aware responses for React development queries, debugging, and interview preparation. • Engineered a dynamic chat interface with persistent session history, real-time message rendering, and Markdown- and syntax-highlighted code block support, improving code readability and end-user response comprehension. • Designed and engineered a responsive two-pane UI (sidebar navigation + chat pane) with dark/light theme toggling and reusable component architecture, ensuring consistent UX across session states. • Deployed and hosted the application on Vercel, integrating with the Grok API via secure server-side/edge functions and optimized build configuration for fast load times and seamless updates <u>Shifra – Voice-Controlled AI Assistant</u> • Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Grok API, Web Speech APIs, Vercel • Developed a voice-activated AI assistant that integrates xAI's Grok API for natural language understanding, paired with real-time speech recognition and text-to-speech synthesis, enabling hands-free, conversational interaction. • Built an animated, state-driven UI featuring a dynamic audio-reactive orb visualizer with distinct states (idle, listening, speaking), enhancing user feedback and interaction clarity. • Configured customizable voice settings — including adjustable speech rate, language selection, and configurable assistant personality via prompt customization to the Grok API — giving users granular control over the voice experience. • Deployed a fully responsive, dark-themed interface on Vercel, optimizing for low-latency voice interaction and cross-browser audio API compatibility. <u>Ecom – Full-Stack E-Commerce Platform</u> • Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Vercel • Built a full-stack e-commerce web application featuring product catalog browsing, an image carousel, and category-based product listings across apparel and electronics. • Enforced secure user authentication with email/password login, "remember me" persistence, and account registration flows, following standard auth UX patterns. • Developed a multi-page responsive site (Home, About, Services, Contact) with dark/light theme support and reusable UI components for consistent design across routes. • Designed a services/trust page highlighting platform features (fast delivery, secure payments, 24/7 support) to improve user confidence and conversion. <u>MovieFlix – Movie Browsing Application</u> • Tech Stack: React.js, JavaScript (ES6+), CSS, Vercel • Built a dynamic, responsive movie browsing application using React functional components and Hooks, implementing real-time search, dynamic content rendering, and category-based browsing (Action, Horror, etc.) to improve content discoverability. • Managed application state and component props to maintain consistent UI behavior across interactions, with a fully responsive, CSS3-based layout that ensures seamless viewing on desktop and mobile devices.
